Untitled.

As Africa’s leading flooring manufacturer, Belgotex designs, makes and distributes high-quality broadloom carpets. A new custom solution wants to make your dreams come true.

Believe it: if you can conceive it, Untitled 2.0 will achieve it. Whether you’d like to start from scratch or prefer to re-style or recolour one of our existing designs, Belgotex has made it possible to turn your vision into reality.

With a catalogue that consists of over 150 designs, divided into several different categories with over 60 popular shades to choose from, you’ll be able to create the perfect floor-scape for your unique décor scheme.

Because Belgotex is committed to making the custom process as enjoyable as possible, we offer complete design flexibility with electronic renderings for each concept and actual custom samples that can be physically placed in-situ to help others see your vision.

A vehicle for radical self-expression, Untitled offers unmatched choice and a personal point-of-view that speaks to the ideals and creativity of the individual, resulting in much more dynamic floorscapes.

Benefits of SDX.

Nylon is the preferred carpet choice because of its durability and how it's able to lock colour into the molecular structure of the fibre.

The advantages include exceptional clarity and colourfastness – even with prolonged exposure to light and atmospheric contaminants – outstanding wear performance – even when subjected to heavy traffic and harsh cleaning agents – and excellent batch-to-batch colour uniformity.

SDX is a Solution Dyed Nylon for extreme conditions. The innovative new-generation nylon fibre from Belgotex offers superior colour-fastness and resistance to stains and soiling. And with over 20 years of proven performance in the most demanding commercial environments, SDX is the synthesis of a superior batch recipe, unique production innovations and world-class manufacturing capabilities.

Additional Benefits Include:

- Improved tensile strength properties and superior colour-fastness to sunlight, bleach and other cleaning chemicals.
- An advanced tri-lobal filament construction retains soil at the carpet surface where it is easier to remove, and absorbs light which assists with the performance of the yarn.
- Twist technology takes a single extruded SDX yarn and combines it with another hard twist, then locks it in with saturated steam, which produces the high-quality tip definition, long-term appearance retention and superior soil-hiding properties.
- High-precision manufacturing to the most stringent tolerances and specifications.
- A sustainable manufacturing process uses a one-step spinning and colouring process that's pollution free, uses no water and produces high yields with low waste levels.
- An experienced global design team ensures that our ranges suit all tastes, and incorporate the latest colour and interior design trends.
- A 20-year warranty provides peace-of-mind for all stakeholders.

Our Process.

The sales rep must complete an electronic custom request for factory approval, after which they'll be notified whether their request meets the requirement and if not, why it has been declined.

Once approved, a designer will be assigned to the project who'll correspond with the rep via the electronic custom request data base, where all correspondence is logged and changes are recorded.

The designer's digital design will be sent to the sales rep for pre-approval, and when the customer is satisfied with the colour and design a final digital sent for sign-off.

On sign-off a physical sample is made on the Kibby sample, which is purely for colour and design, not specification. Specification samples are found in the Untitled Custom Broadloom box. A physical sample of your design will be labelled as per the digital, and these will be packaged in custom boxes for customer approval.

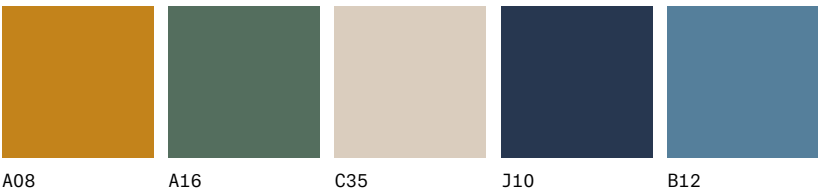

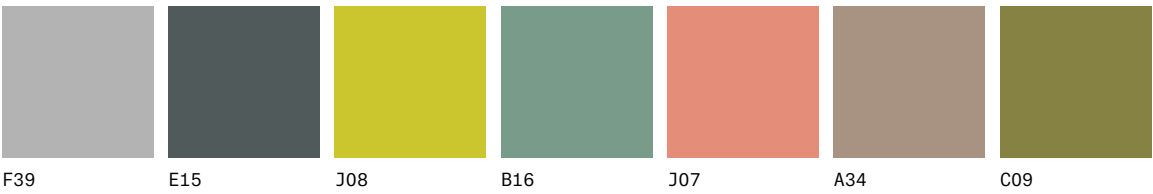

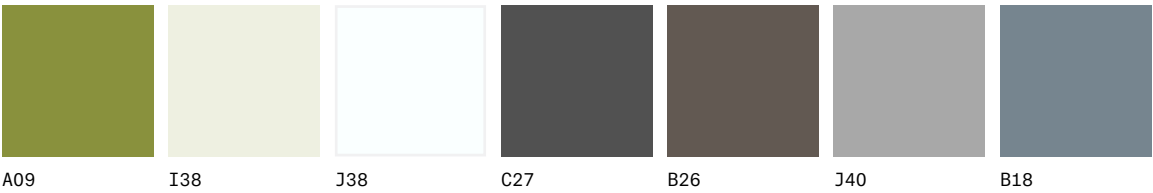

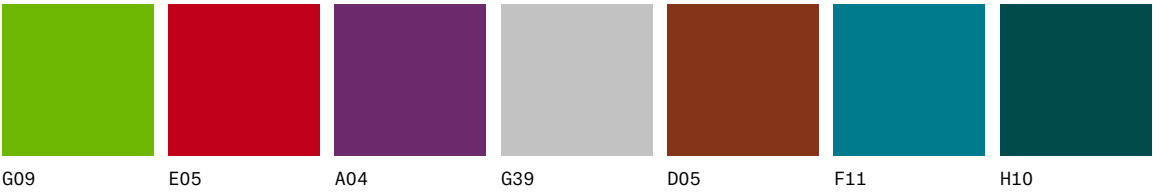

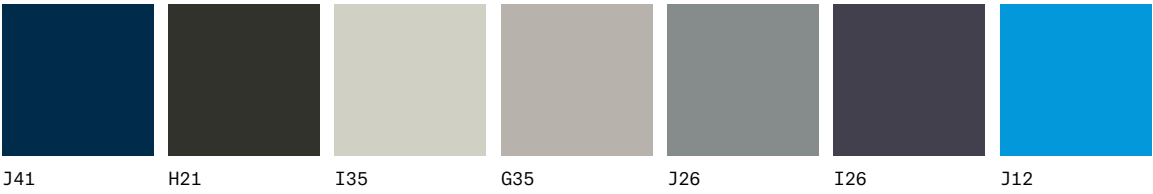

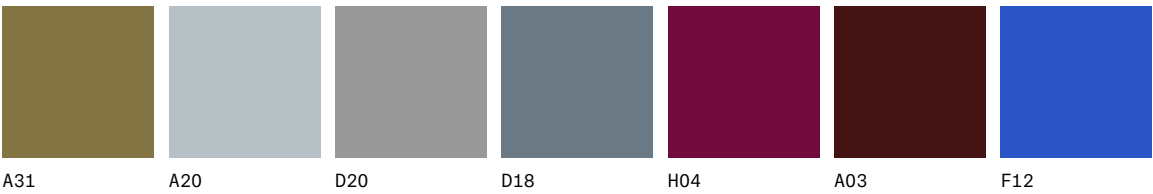

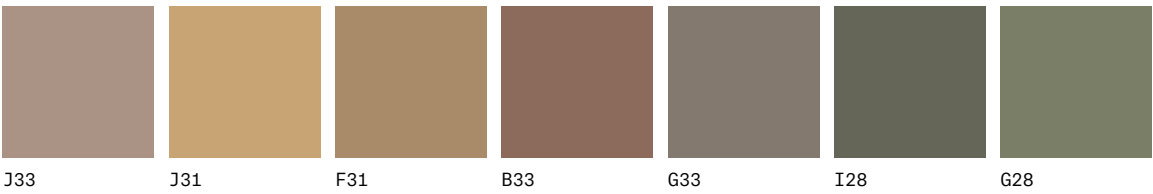

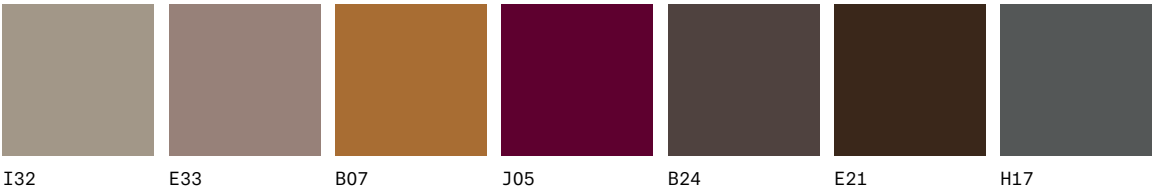

Once received and customer wants to place the order, the following documents below will be required by the factory to proceed with production. Note if any of the below documents are not completed with the correct information or incomplete, order will be pending until all documents are correctly forwarded to the factory.

- **Order** – Must state Project No, Pattern Ref, Colour Ref, Product Width, Finished Backing, Quantity
- **Digital sign-off** – Signed and Dated by customer, scanned in colour and e-mailed or attached to electronic custom request
- **Physical sample sign-off** – Signed and Dated by customer, scanned in colour and e-mailed or attached to electronic custom request
- **Acknowledgement of condition form** – Must be completed with order and forwarded
- **Mock Room Policy*** (if required)

Colour Bank.

This colour bank consists of over 60 solid SDX colours with over 1600 shades were created by twisting each colour with the balance of the colour bank.

Pages 14 and 15 depict only 400 out of the thousands of possibilities.

Please note that this colour bank is subject to changes from time to time.

Complimentary Colour Bank.

From over 60 solid SDX colours, Untitled Custom Broadloom offers a combination of these colours to create a spectrum of shades. Now you have a variety of colours to choose from. Untitled has brought colour to the next level of choice.

* For a true representation of colour, please contact your nearest Belgotex representative to view a sample.

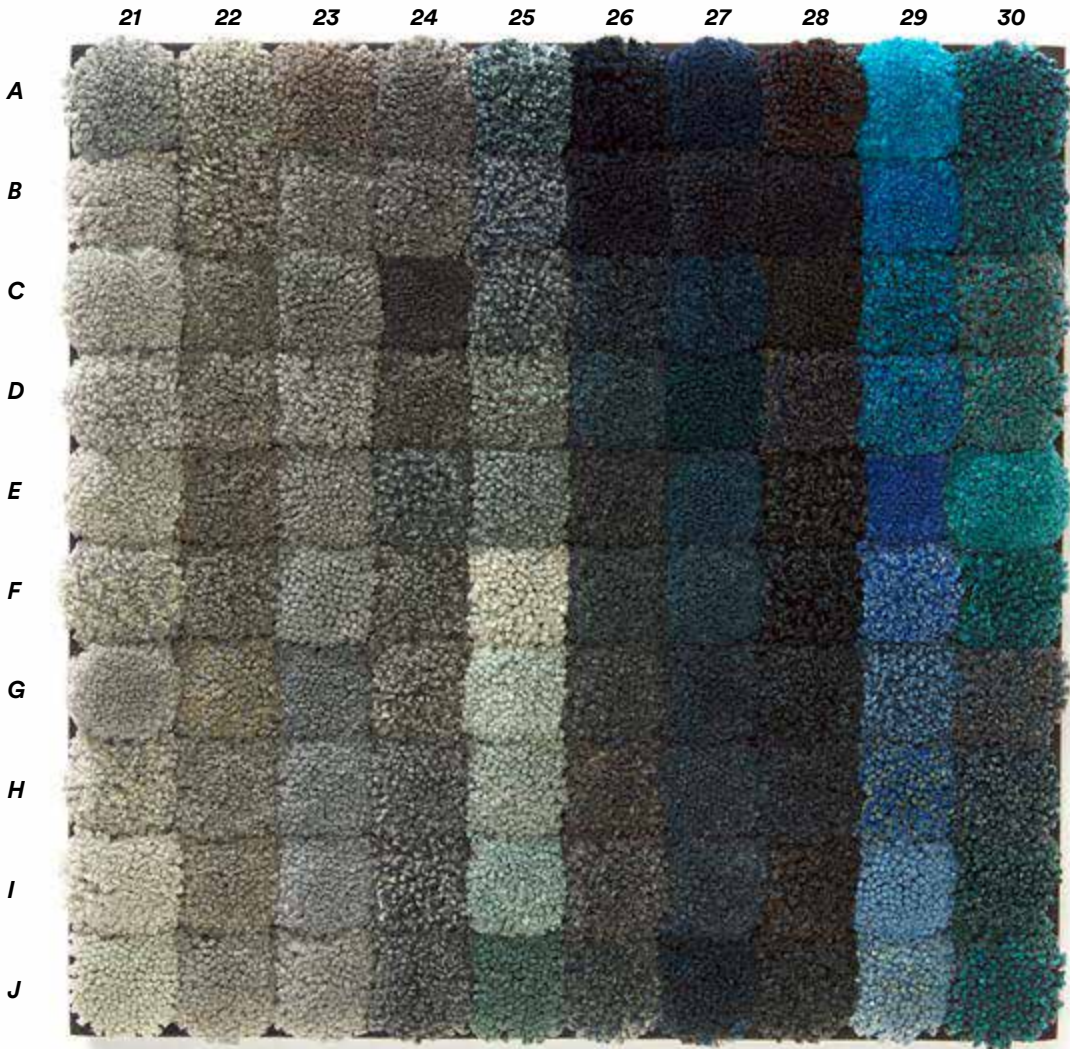

Complimentary Colour Bank.

Complimentary Colour Bank.

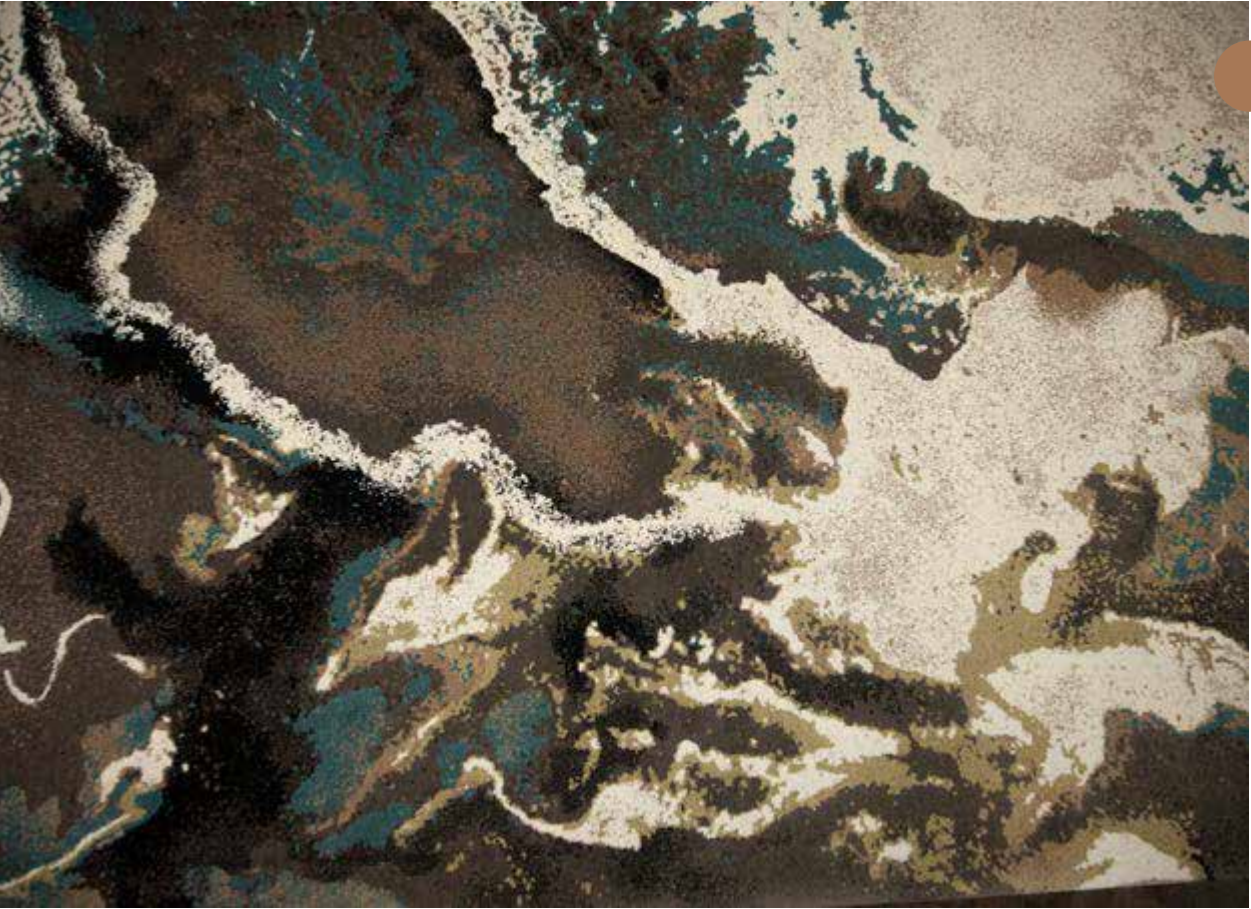

Our Collections.

Some projects deserve a more tailor-made approach than what's readily available. Untitled is Belgotex's custom offering where the only limits are the confines of your imagination.

Celebrating the diverse beauty of carpet, the new library of designs includes exciting collaborations, vibrant patterns, a huge range of statement colours and fashion-inspired designs.

With machinery that's able to tuft 100% Cut Pile for a luxurious finish, as well as Level Cut Loop adding another dimension to the design, this technology results in

your boundless creativity finding a bespoke solution to your flooring needs.

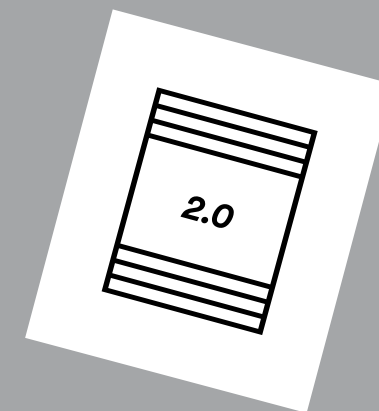

The possibilities are endless, and working with our skilled design team you're able to create carpets that are a collaboration of our archive and your vision.

Pattern Repeats.

Understanding your carpet's pattern repeat is important in determining the amount of material required and the best way to install it.

Most carpets are a solid shade with a simple texture. However, more complex, patterned carpets make a big statement and are worth the extra installation efforts and material required. Pattern repeat is simply the vertical distance between where the pattern is identical again (repeats). That distance can be a few centimetres or as much as the entire width of the carpet.

There are several kinds of pattern repeats: random pattern match (no need to worry about matching any pattern at all), straight across match (simply match on either side), and drop match. In the case of our dense paisley pattern, this features the most complex pattern match of all – a multiple drop match – which needs to be aligned both horizontally and vertically.

Your Guide to Carpet Care.

Your carpet is an investment in comfort and style. To keep it looking good and lasting longer, proper care and attention is required in the installation and maintenance thereof.

To get the most out of your carpet, and to keep the Belgotex guarantee and warranty in place, it is important to adhere to the following maintenance procedures (SANS 10245).

01. Important Information

- Colours may vary within commercial tolerance from dye batch to dye batch. Do not install different dye batches together in the same installation.
- In the instance of a cut pile, the pile laying in different directions has varied effects on light reflection. New owners to this type of carpet should be aware that this is a desirable characteristic, sometimes called shading, and is by no means a defect.
- Irregular pattern repeats can occur. Pattern repeats are for assistance in viewing patterns in perspective, and they must be verified prior to installation. Carpeting is a textile material, and therefore subject to variations that are acceptable in the textile industry. These variations can sometimes create irregular pattern repeats. Installation should be done by professional carpet fitters, with experience in the installation of patterned products. Even if the material is within manufacturing tolerances, all parties need to be

- aware that “standard” installation methods will not always bring patterns to an acceptable level for the client.
- Product specifications are based on averages from normal manufacturing tolerances. Such variations do not affect product performance.
 - This product is UV stabilised for indoor use, as it is intended solely for use as an indoor floorcovering. It is not recommended or sold for any other purpose unless otherwise stated.
 - This floorcovering is guaranteed by Belgotex for a period of 5 years against any patent and latent defects in the manufacturing process. For this product offering, Belgotex provides a 15-year limited wear warranty against excessive fibre loss.
 - Pile pressure marks from the likes of furniture, fading from exposure to direct sunlight, and soling, are not manufacturing defects.
 - Carpet protector mats are recommended where castor wheels are used.
 - Carpets fitted on stairs must be protected with stair nosing.

02. Installation

Our floorcoverings must be installed by a reputable installer in accordance with the Fitting Code of Practice (SANS 10186). Also refer to the manufacturers installation guidelines.

For tufted carpets, the best possible underlay is to be installed to provide extra comfort and acoustic benefits, and to enhance the appearance and durability of the carpet. Refer to manufacturers underlay recommendations.

Belgotex accepts no responsibility for damage to the carpets that have not been installed in accordance with these guidelines.

Installation must take place after construction is complete. Belgotex will accept no responsibility or honour any warranty for installations made during construction work that are inadequately protected against damage.

03. Maintaining Your Carpet

Regular vacuuming will remove dry soiling and dust, ensuring a clean and healthy environment. We recommend the use of an upright vacuum cleaner as the beater brush ensures the carpet fibre is opened during vacuumation which in turn ensures the removal of dry seated soil. A clean carpet is a long-wearing carpet; therefore, you cannot vacuum too much. If using an upright vacuum cleaner with rotating beater brush, care should be taken to set the brush height to skim lightly over the carpet pile, thus avoiding unnecessary abrasion (fuzzing).This type of vacuum system is not recommended for natural staple fibre products.

- Correct and regular maintenance will increase the life-span of the carpet and help to maintain its appearance. Cleaning should be proportional to the amount of soiling to which the carpet is subjected.
- To prevent crushing of the carpet pile and eventual damage to the backing, place castor protectors or carpet off-cuts under furniture.
- Rearranging furniture periodically will allow the pile to recover and will also change the traffic pattern in a room ensuring that the carpet wears more evenly.

- Although the quality of carpet pigment has never been better, it is important to close blinds or shades when the carpet is in direct sunlight as prolonged exposure can cause colours to fade.
- To reduce soiling and wear in high traffic areas, place recommended walk-off mats at all entrances. These should be cleaned and rotated regularly.

04. Quality Management System

Belgotex Floors Quality Management System is certified to SABS ISO 9001. Every carpet carries the SABS ISO 9001 logo as your assurance of quality and our commitment to maintaining the highest international standard.

05. 5-year Manufacturing Guarantee

All our carpets are covered by the Belgotex 5-year guarantee against patent and latent defects in the manufacturing process. All claims will be treated in accordance with the South African Carpet Manufacturers Standard Claims Policy.

However, carpets must be maintained and cleaned in accordance with the written instructions of Belgotex. Devaluation of 20% per annum will apply if material being replaced is due to a manufacturing defect.

06. 15-year Limited Wear Warranty

Belgotex products are covered by the Belgotex 15-year warranty, which states that, when installed and maintained as recommended by Belgotex, these carpets will retain at least 90% of their pile fibre for fifteen years.

Devaluation of 6.66% per annum will apply if material being replaced is due to a manufacturing defect. If dissatisfied with the performance of the carpet, please notify your retailer and permit Belgotex Floors to examine and test the product.

Subject to the above qualifications, exemptions and limitations, if the product has lost 10% or more of its pile fibre as a result of normal wear and tear, the affected area will be replaced in accordance with the South African Carpet Manufacturers Standard Claims Policy.

07. South African Carpet Manufacturers Claims Policy

Belgotex adheres to the stringent quality control standards regarding the manufacturing processes and the materials used. In the unlikely event of a manufacturing or material defect being discovered in your Belgotex carpet, your claim will be assessed according to the terms of the South African Carpet Manufacturers Claims Policy, subject to a pro-rata devaluation of 20% per annum.

The terms and conditions of this policy can be requested from Belgotex, or viewed at www.belgotex.co.za

08. Area Classification

Medium Commercial

Carpets are classified according to their suitability to various applications with the residential and commercial environment.

Heavy Commercial

As wear conditions can differ appreciably in similar specified areas depending mainly on occupancy and environmental conditions, it is advisable to obtain expert advice from your local carpet dealer or manufacturer before area suitability is finally decided upon.

09. Fibre Type

Stainproof SDX (Solution Dyed Nylon for X-treme Conditions) is a new generation nylon fibre offering superior colour-fastness and resistance to stains and soiling.

10. Backing

A unique weaving process locking Belgotex Stainproof SDX yarn that give the product stability. A weaving process comprises of a Polypropylene Warp and a Polyester Weft which is stain resistant, adds durability and structure to the product. The AXiBac is locked with the fibre by a natural Latex that helps keep the product from delaminating.

11. Quality Management System

Belgotex Quality Management System is certified to ISO 9001. Every carpet carries the ISO 9001 logo as your assurance of quality and our commitment to maintaining the highest international standard.

12. Environmental

Belgotex Environmental Management System is certified to ISO 14001. This is your assurance of our commitment to the environment.

Belgotex is a member of the Green Building Council of South Africa.

Products manufactured by Belgotex are 6 Green Star rated by the GBCSA.

Products manufactured by Belgotex are Green Tag accredited globally with a Level A rating.

13. Disclaimer

- Ranges
Belgotex reserves the right to change and update its carpet ranges at any time. Before designing your installation using any named carpet and its colourways, please contact your Belgotex representative to ensure availability.
- Carpet Care and Stain Removal
Belgotex cannot be held responsible for any damage that may occur to carpets as a result of the incorrect application of maintenance and stain removal procedures. Consult your Belgotex representative for details on cleaning methods.

And if this doesn't cover it, please contact one of our sales representatives who are here to help.
